ICS-300: Intermediate ICS for Expanding Incidents

ICS-300 is a two and half day course designed to enable personnel to operate efficiently during an incident or event within the Incident Command System. This course focuses on management of expanding incidents. Course length is dependent on the students' ability to meet the objectives. The target audience for this course are individuals who may assume a supervisory role in expanding incidents. ICS-100 and ICS-200 are prerequisites for this course.

Course Objectives:

- 1.) Describe how the NIMS Command and Management component supports the management of expanding incidents.
- 2.) Describe the incident/event management process for supervisor and expanding incidents as prescribed by the Incident Command System.
- 3.) Implement the incident management process in a simulated incident.
- 4.) Develop an Incident Action Plan for a simulated incident.

Instructor

Todd Manns, Certified PSC III
Emergency Management Coordinator
Berthoud Fire Protection District
Berthoud, Colorado
